

Table of contents

Foreword	1
Objective	2
Method	3
Searching for evidence	
Classification of the evidence	
Classification of recommendations	
Text and recommendations: drafting and consensus building	
List of abbreviations	5
1. Introduction	9
1.1 Definition	
1.2 Prevalence	
1.3 Risk factors	
1.4 Pathogenesis	
1.5 Physiopathology	
2. Diagnosis	14
2.1 Clinical features	
2.2 Asthma phenotypes	
2.2.1 Adults	
2.2.2 Children	
2.3 Pulmonary function	
2.3.1 Adults	
2.3.2 Children	
2.4 Allergy evaluation	
2.5 Classification of asthma in adults	
2.5.1 Severity	
2.5.2 Control	
2.6 Methods for measuring asthma control	
2.7 Classification of childhood asthma	
2.7.1 Severity	
2.7.2 Control	

3. Treatment	26
3.1 Objectives	
3.2 Pharmacological treatment	
3.2.1 Steps	
3.2.2 Inhalers and nebulizers	
3.3 Other treatments	
3.3.1 Environmental control	
3.3.2 Allergen immunotherapy	
3.3.3 Influenza and pneumococcal vaccinations	
3.4 Education	
3.4.1 Objectives	
3.4.2 Knowledge and skills	
3.4.3 Action plan	
3.4.4 Treatment adherence	
3.4.5 Other aspects to be considered	
4. Asthma exacerbations	35
4.1 Severity evaluation	
4.2 Treatment	
4.2.1 Mild exacerbation	
4.2.2 Moderate-severe exacerbation	
4.2.3 Treatment failure	
4.3 Criteria for hospitalization	
4.4 Criteria for hospital discharge	
5. Treatment of childhood asthma	40
5.1 Maintenance therapy	
5.1.1 Drugs	
5.1.2 Treatment according to the level of severity and the degree of control	
5.2 Evaluation and treatment of exacerbations	
5.2.1 Evaluation of severity	
5.2.2 Drugs	
5.2.3 Therapeutic regimens	
6. Rhinitis and nasal polyposis	45
6.1 Definitions	
6.2 Classification	
6.3 Epidemiology	
6.4 Diagnosis	
6.5 Rhinitis and asthma	
6.6 Treatment	
6.7 Sinonasal polyposis and asthma	
7. Asthma and chronic obstructive pulmonary disease	52
7.1 Concept and definitions	
7.2 Diagnosis and evaluation	
7.3 Treatment	

8. Severe uncontrolled asthma	55
8.1 Concept and definitions	
8.2 Severe asthma phenotypes	
8.2.1 Allergic asthma	
8.2.2 Late-onset eosinophilic asthma	
8.2.3 Obesity-associated asthma	
8.2.4 Late-onset neutrophilic asthma	
8.3 Diagnosis and evaluation	
8.3.1 Confirmation of asthma diagnosis	
8.3.2 Identification of external factors	
8.3.3 Characterization of severe asthma phenotypes	
8.4 Treatment	
8.4.1 General measures	
8.4.2 Treatment according to severe asthma phenotypes	
8.4.3 Other therapies	
8.5 Differential features of severe asthma in childhood	
8.5.1 Definition	
8.5.2 Initial assessment	
8.5.3 Treatment	
9. Special circumstances	62
9.1 Asthma in pregnancy	
9.1.1 Effects of asthma on pregnancy	
9.1.2 Treatment of asthma in pregnancy	
9.2 Work-related asthma	
9.2.1 Occupational asthma	
9.2.2 Work-exacerbated asthma (WEA)	
9.3 Exercise-induced asthma	
9.4 Aspirin-exacerbated respiratory disease (AERD)	
9.4.1 Diagnosis	
9.4.2 Treatment	
9.5 Vocal cord dysfunction (VCD)	
9.6 Criteria for specialist referral	
10. Dissemination and implementation plan	69
11. Acknowledgment	70
12. References	71
