Results of positive skin prick test (commercial and prick-by-prick) are shown. In bold, the reactions with "plant food mix"; A= apple, Ak= anisakis, Al= almond, An= anaphylaxis, AnS= anaphylactic shock, As= asparagus, A9= Ara h 9, Ba= banana, C= corn, Ca= carrot, Cb= cabbage, Cd= Chard, Cf= Cauliflower, Ch= chickpea, Cr= cherry, C8= Cor a 8, Eg=egg, Eg-w= egg-white, F= fig, Gb= green beans, Gl= garlic, Gs= gooseberry, Gr= grape, H= hazelnut, J3= Jug r 3, K=kiwi, Le= letucce, Lm= lemon balm, Lt= lentil, M=mustard, Me= melon, Mh= mushroom, Mk= milk, Mn= mandarin, M3= Mal d 3, Og= orange, Oa= ovoalbumin, Ol= olives, Om=ovomuroid, On= Onion, P= peach, Pe= Pepper, Pg= pomegranate, Pi= Pine nut, Pn= peanut, Po= potato, Pr= pear, Pw= prawn, P3= Pru p 3, Ri= Rice, Ru= arugula, Sf= sunflower seed, Sw= strawberry, To= tomato, T14= Tri a 14, W= walnut, Wh= wheat, Wm= watermelon, Zc=zucchini.

Supplementary Table 2a. Top 3 food combinations involved in “plant food mix” group reactions

FOOD COMBINATION	“PLANT FOOD MIX” GROUP
	n= 67 patients
	Nº of patients with reactions with each combination
Le, To, C, Wh	3
Le, To, Wh	3
Gb, On, Wh	3

Le= lettuce, To= tomato, C= corn, Wh= wheat, Gb= green beans, On= onion

The rest of plant food combinations (56) were observed in less than 3 patients, showing the great variability of food combinations that may result in a LTP-dependent reaction.

Supplementary table 2b. Top 5 foods involved in “plant food mix” group reactions

“PLANT FOOD MIX” GROUP	
59 food combinations	
FOOD	No of combinations where each food is involved (%)
Wheat	38 (64)
Lettuce	31 (53)
Tomato	23 (39)
Walnut	15 (25)
Green beans	14 (23)
