Supplementary Material

Supplementary Figure S1 Acholic stool (arrow) of patient 1 at day 7

Supplementary Figure S2 Bloody stool and diarrhea (arrow) of patient 1 at day 8
**Supplementary Figure S3** Abdominal ultrasonography showing the dilated bile duct (arrow) of patient 1, in which there was no color signal. In normal newborns, the bile duct is undetectable by ultrasonography.

**Supplementary Figure S4** Bloody stool and diarrhea (arrow) of patient 2 at day 7.
Supplementary Figure S5 Acholic stool (arrow) of patient 2 at day 23
