Supplementary Figure. Time course of drugs therapy, ventilatory support, inflammatory blood parameters, Chest CT.

Legend: Arrow – single icatibant dose; BD – two times a day; COBI – cobicistat; CPAP – continuous positive airway pressure; CRO – ceftriaxone; CRP – C reactive protein (normal range: <5 ml/L); CT – computer tomography; DRV – darunavir; FiO2 – fraction of inspired oxygen; HCQ – hydroxychloroquine; IFN-γ – interferon-γ (normal range: not detectable); IL-6 – interleukin-6 (normal range: 0.76-6.38 pg/ml); IL-8 – interleukin-8 (normal range: 6.7-16.2 pg/ml); OD – once time a day; PaCO2 – arterial carbon dioxide partial pressure; PaO2 – arterial oxygen partial pressure; PaO2/FiO2 - arterial oxygen partial pressure / inspired oxygen fraction; PEEP – positive end-expiratory pressure; TD – three times a day; TNF-α – tumor necrosis factor-α (normal range: 8-12 pg/ml).
