

Supplement Figure 1

FeNO values during symptomatic and recovered SARS-CoV-2 infection depending on patient's severity. FeNO levels slightly decreased during symptoms independently of severity.

C: control group, Mi: mild SARS-CoV-2 infection, Mo: moderate SARS-CoV-2 pneumonia and S: severe SARS-CoV-2 pneumonia. I: during infection (baseline measurement), R: during recovery.

Supplement Figure 2

Monitoring FENO values in hospital admitted patients. FeNO decreased significantly ($p=0.03$) in SARS-CoV-2 infected patients during hospitalization.
