SUPPLEMENTARY MATERIAL

Figure 1S. AIRQ™, Asthma Impairment and Risk Questionnaire

Cultural adaptation of original version of AIRQ to Spain was done following the standard procedure including two forward translation into Spanish, harmonization of both translated versions, 1 back-translation into English, reconciliation of original version and back-translated version, and cognitive debriefing with 5 patients with asthma.
Figure 2S. ROC curves and performance characteristics of the AIRQ questionnaire for the Spanish cohort based on the participant’s ACQ-6 score plus exacerbation history to distinguish well-controlled from not well-controlled/very poorly controlled asthma (model 1).

Figure 3S. ROC curves and performance characteristics of the AIRQ questionnaire for the Spanish cohort based on the participant’s ACQ-6 score plus exacerbation history to distinguish well-controlled/not well-controlled from very poorly controlled asthma (model 2).
