ABG denotes arterial blood gas; ECMO extracorporeal membrane oxygenation; FiO2 fraction of inspired oxygen, %; ICU Intensive Care Unit; iPEEP intrinsic positive end expiratory pressure, cm H<sub>2</sub>O; MV mechanical ventilation; PaCO<sub>2</sub> partial pressure of CO<sub>2</sub>, mm Hg; PaO<sub>2</sub> partial

pressure of oxygen, mm Hg; Paw airway pressure, cm H<sub>2</sub>O/L/sec; PCT procalcitonine, ng/ml; Pplat plateau pressure, cm H<sub>2</sub>O; Raw airway resistance, cm H<sub>2</sub>O/L/sec; TV tidal volume, ml/kg IBW (ideal body weight). ECMO was initiated on day 4 and was discontinued on day 14. Day 12, administration of first dose of reslizumab. Day 16, start of empirical treatment with broad-spectrum antibioticotherapy. No microorganisms were isolated at any time in microbiological samples (BAS, BAL, blood, urine).
