

SUPPLEMENTARY MATERIAL

Figure S1. Quantification of soluble complement receptor type 1 (sCR1) in serum before (pre-desensitization) and after RDD (post-desensitization). sCR1 of control 1 was measured before (pre-administration) and after istuximab exposure (post-administration). sCR1 determination of case 1 post-desensitization and control 2 post-administration was not possible. ND, no data.
