Pharmacology and Therapeutics of Asthma and COPD

Series: Handbook of Experimental Pharmacology, Vol. 237

C.P. Page, P.J. Barnes (Eds.)
SPRINGER. 1st ed. 2017, X, 285 p.

- Accessible overview of current and novel approaches to treatment of asthma and COPD
- Well illustrated and comprehensive
- Referenced as an authoritative update to two previous volumes in the series

The present volume is supposed to be a major reference resource for chest physicians and those involved in the development of novel pharmaceutical entities for these diseases. Internationally recognized authorities review the most important new information on the advances in our understanding of the pathogenesis and treatment of these diseases, including the substantial advances in the topical delivery of inhaled medicines. Each chapter is extensively referenced, generously illustrated with clear diagrams and photographs, and represents a state-of-the-art review of this important area of respiratory medicine.

Sinus Headache, Migraine, and the Otolaryngologist A Comprehensive Clinical Guide

Editors: Mehle, Mark E
SPRINGER. 1st ed. 2017, X, 250 p. 17 illus. in color.

- An essential guide for trainees and Otolaryngologists in their daily practice
- Provides patient handouts for Sinus Headache and Migraines
- Written by experts in the field

This volume will serve as a comprehensive and useful guide for ENT physicians in the recognition, diagnosis, and treatment of patients who suffer from sinus headaches and migraines. The text reviews key issues such as identification and management of migraine, and appropriate surgical and nonsurgical treatment that is often not part of ENT resident training. With 20% of women and 6% of men having migraines (only 50% recognized) this text will serve to expand management options to physicians already operating on

sinuses or seeing cosmetic patients with head and neck concerns. Other forms of intervention in migraineurs, such as surgery, Botulinum Toxin injections and adjunctive and integrative therapy, are covered.

Sinus Headache, Migraine, and the Otolaryngologist will be an invaluable resource for ENT and allergy specialists, and any physician or medical professional with an interest in sinus headache or migraine.

Top 50 Dermatology Case Studies for Primary Care

D. Reich, C.E. Psomadakis, R.L. Buka
SPRINGER. 1st ed. 2017, XVII, 356 p. 123 illus. in color.

- Presents case studies of various skin conditions from the standpoint of the primary care physician and the dermatologist
- Answers questions for primary care physicians such as when to treat, how to treat, when to refer, when to biopsy, and when to reassure
- Provides an accurate and real reflection of the kinds of skin conditions primary care physicians encounter
- Informs and educates primary care physicians with a dermatologist's perspective

This landmark text is dedicated to the conversation had between a primary care physician and a dermatologist that is a true reflection of the way medicine works when these physicians collaborate on the same case. The book uses actual case studies from the authors' offices and provides an accurate and real portrayal of the types of skin conditions primary care physicians encounter. Answering questions such as when to treat, how to treat, when to refer, when to biopsy, and when to reassure, this book informs and educates primary care physicians with a dermatologist's perspective. Top 50 Dermatology Case Studies for Primary Care gives the reader an entirely new vantage point from which to view dermatologic cases, and together with one of New York City's top dermatologists, the authors look at the same case, the same patient, and compare what each did or would have done. Written for family medicine and internal medicine physicians, residents and providers, Top 50 Dermatology Case Studies for Primary Care proves to be an invaluable resource in their day-to-day practices.
